 DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This large structure is constructed of steel framed corrugated metal, built on a concrete base. It is composed of a central, three story high, five bay wide, fourteen bay deep section, flanked by a pair of two bay wide, eight bay deep wings.

A massive pair of sliding doors are set at the front center of the structure. All windows are of industrial type, with metal sash and twenty or twenty-five lights. Central panels of six lights are horizontally hinged. Resembling a squat T in plan, a one story brick structure with a shed roof is built against the rear wall of the southeast corner of the metal building. A large enclosed yard is to the south.

Acme Steel, occupies ground which was once the site of a stone yard and about a dozen brick row houses. Built c.1935, it is one of two metal clad structures in the neighborhood. The facilities were vacated by Acme in the Winter of 1976-77.
